Construct

A squad of *AI employees* for your *Team.*

They work across the tools that power your business and turn recurring tasks into reusable workflows.

PROBLEM

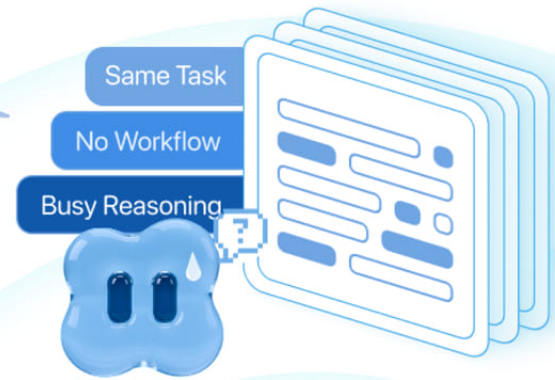

AI agents can do the work. They just don't *work like employees* yet.

No Company Context

Cold start every task

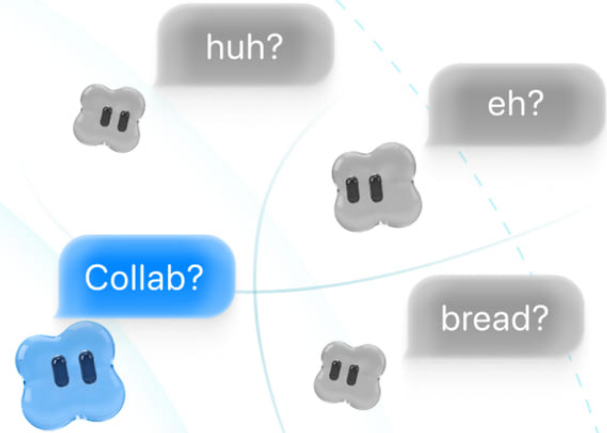

It doesn't know your business, projects, or processes. Every task starts from zero.

Re-reasons every time

Same task, new thinking

Recurring work burns tokens again and again instead of becoming a reusable workflow

No shared workspace

Works alone, hard to collaborate

Agent sessions are hard to share, supervise, or collaborate on as a team.

SOLUTION

A colleague with a desktop.

Watch them work.

Watch Demo on Youtube

Product Hunt launch video

WHY NOW

This is the perfect *time to be doing this*

01

Frontier models

crossed the reliability threshold for multi-step autonomous work. Gemini 3, Fable 5, GPT-5 can now complete hour-long tasks without supervision.

02

Every business tool

now ships an MCP endpoint. Gmail, Slack, Notion, HubSpot, Linear, Salesforce - agents can operate the entire SaaS stack without a single custom integration.

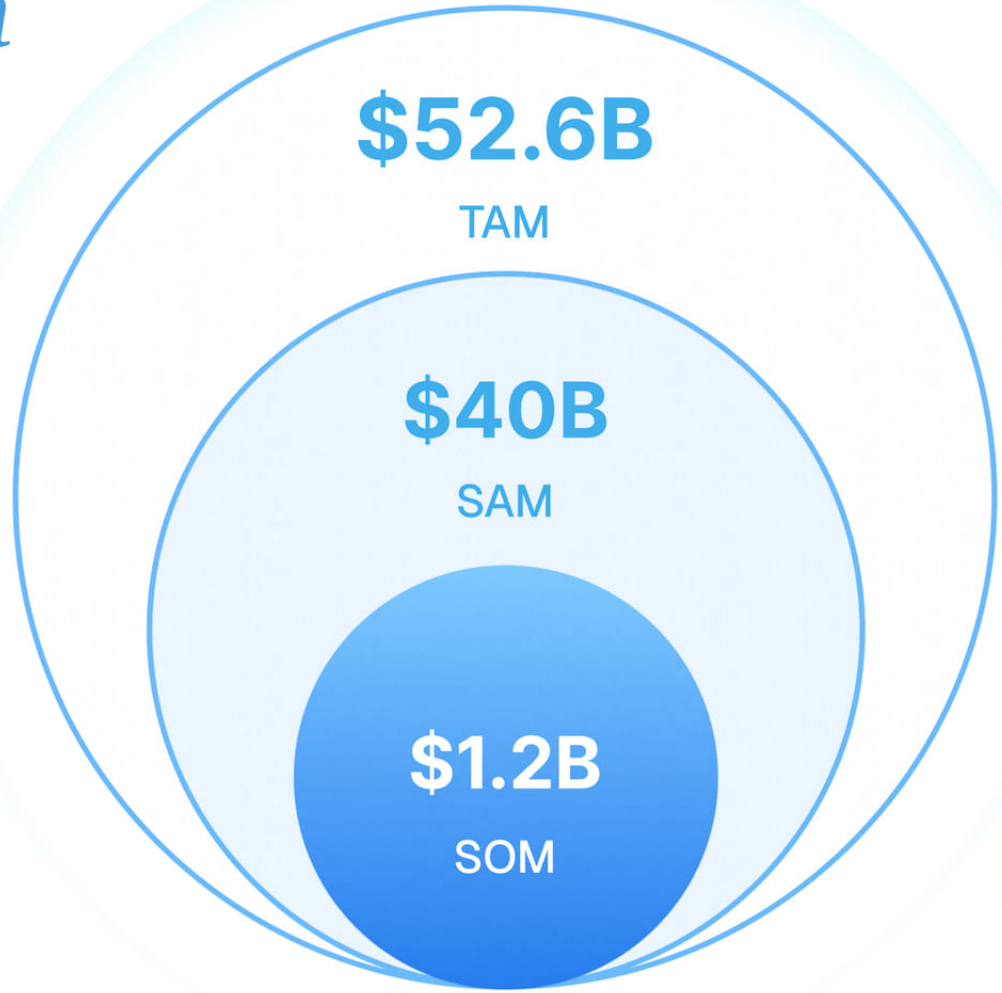

03

Gartner:

40% of enterprise apps will embed AI agents by end of 2026 up from less than 5% last year. The wave isn't coming. It's here, and the product nobody trusts to run a business doesn't exist yet.

MARKET

36M US small businesses. *Only 8.8% use AI in production*

TAM
Total addressable market

Global spend on workflow automation, low-code, work management, and internal tooling.

SAM
Serviceable Addressable Market

US market across SMBs and mid—market teams that operate across multiple SaaS tools.

SOM
Serviceable Obtainable Market

20% market share within our wedge in the first 5 years.

GO TO MARKET

How we'll get our first *500 customers*

Scoped outreach and partnerships around teams already drowning in recurring work

WE KNOW WHERE THE PAIN IS

Communities, founder networks, operator groups, Slack and Reddit.

People are already asking for help with broken workflows across the tools they use every day.

Notion · Airtable · HubSpot · Sheets · Zapier · Slack · Make · HubSpot

WE KNOW WHO TO TARGET

Small teams with recurring ops work and not enough people to keep up.

Founders & Operators
Running lean, need systems that just work

SaaS Teams
RevOps, customer ops and reporting

Agencies & Consultants
Managing client ops and reporting at scale

DTC & E-commerce Teams
Inventory, finance, CRM and ad data chaos

Ops Leads in SMBs
Doing the work no one else has automated

OUR FIRST 500 CUSTOMER MOTION

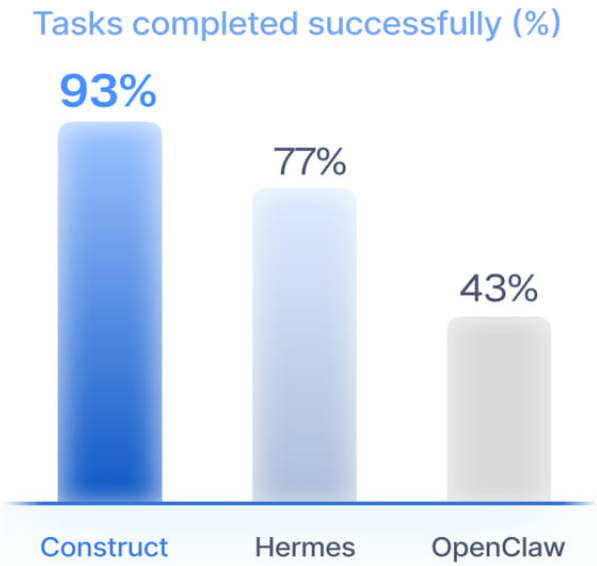

Founder-led tightly scoped, and partnership-driven.

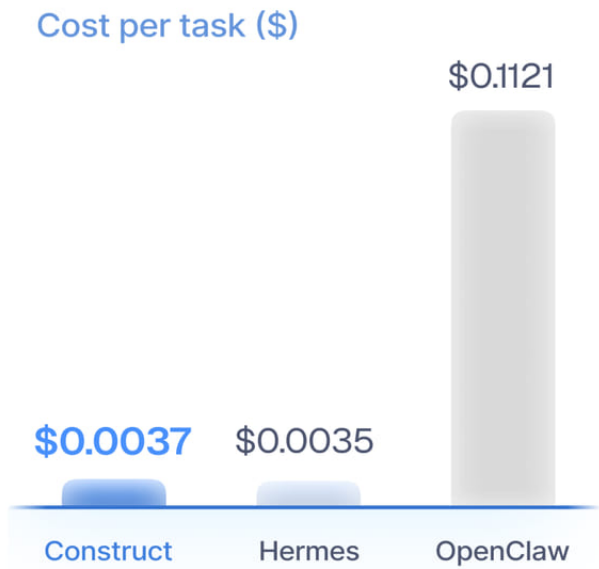

- **Scoped outbounds**
  We target teams with a specific recurring workflow we already know Construct can handle.
- **Personalised demos**
  Show their own workflows running inside construct
- **Expand through partnerships**
  Agencies, communities, operators already serving our ICP
- **Turn win into distribution**
  Turn one customer workflow into a repeatable playbook.

WHY CONSTRUCT

Construct completes more work *at a fraction of cost.*

In our benchmark of real office tasks, Construct completed more tasks successfully than Hermes or OpenClaw, while costing 30x less per task than OpenClaw

Better Harness

Custom long-running automation harness. Beats OpenClaw/Hermes on completion, reliability, and cost.

Easier Adoption

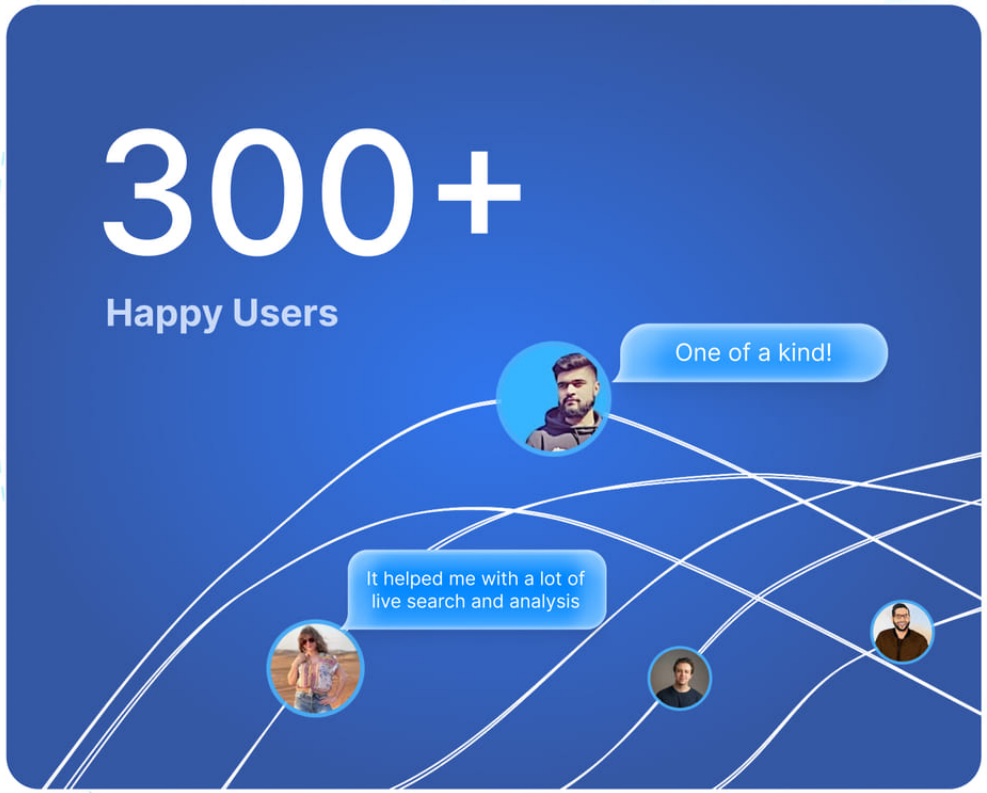

No Mac Minis. No self-hosted infra. No fragile setup. Hire an agent in minutes.

More Work, Less Cost

Construct is built for long-running tasks with fewer failures, fewer restarts, and lower token waste. The businesses get more autonomous work done without runaway AI costs.

THE TRACTION

Our Social Credits *Growing At A Massive Scale.*

BUSINESS MODEL

$9 to try. $299/mo for a full-time hire.

Lite

$9

Try an employee. Core tools, limited weekly compute budget.

GM ~ 30%

Starter

$59/mo

For solo operators and side - project automation.

GM ~ 45%

Pro

$299/mo

For businesses running automation in production. Full workspace, background agents, all integrations.

88% expected marginal GM

Enterprise

Custom

Dedicated deployment, SSO, compliance, volume pricing.

BYOK / customer-paid inference; ~94% + margin potential

TEAM

The *founders*

Ankush

CTO · CO-FOUNDER

Former EIR at Forward Research with 6+ years in distributed infrastructure. Built an AI-powered IDE to 30K+ users and acquisition, core contributor to the AO Blockchain.

BetterIDEa · arweave india · forward research

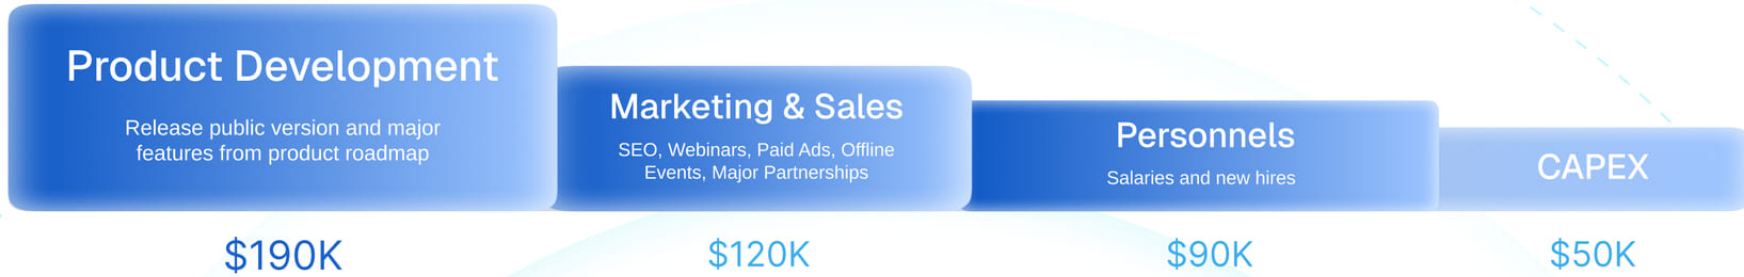

Nischal

CEO · CO-FOUNDER

Founded Arlink, a neo-cloud platform backed by Arweave. Deep experience building DevOps, and distributed infrastructure from zero to production, 10x hackathon winner.
